

Brushless Motors from MCI Service Parts

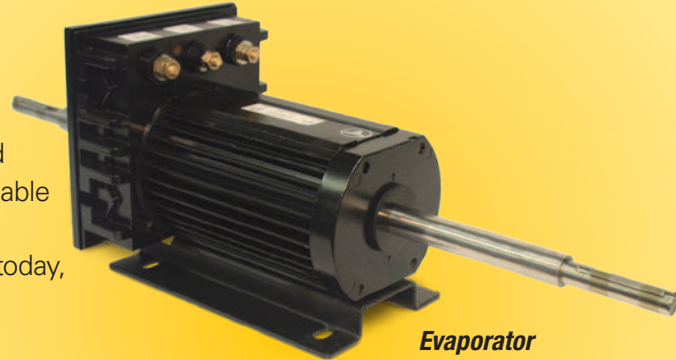

Defroster / Parcel Rack Blower

Reduce maintenance costs, power usage with OEM retrofits!

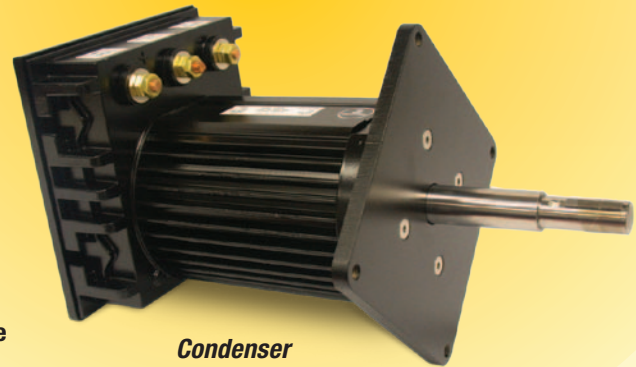

Long-lived and virtually maintenance-free, brushless motors are standard equipment on new MCI coaches. And now, these OEM motors are available for older coaches as well. Our retrofit kits make it easy to install these state-of-the-art brushless motors in all recent MCI models. Order yours today, and get ready to enjoy significant savings down the road.

OEM brushless motors offer:

- Quality that meets or exceeds OEM specifications for materials, dimensions and mechanical characteristics.
- Reduced maintenance and downtime.
- Lighter weight than conventional motors.
- Built-in over-temperature protection.
- Under-voltage shutdown protection.
- Reduced power consumption — up to 43% less than with conventional motors when entire coach is brushless-equipped.
- Higher efficiency, for reduced electrical-system stress and lower overall vehicle energy consumption.
- Rated lifespan of 40,000 or 60,000 running hours, depending on model. For a 40,000-hour motor, that equates to roughly 4.5 years of continuous 24-hour operation or 6 years of typical heavy usage.

Evaporator

Condenser

Description	Part Number	Replaces	Rated Life**	Limited Supplier Warranty	Price
D-Coach Evaporator	16-08-6193	16L-8-5	60,000 hours	4 years	\$1,359.00
