

NEW!

MCI A/C compressor aftermarket retrofit kit

Improve your A/C efficiency today!

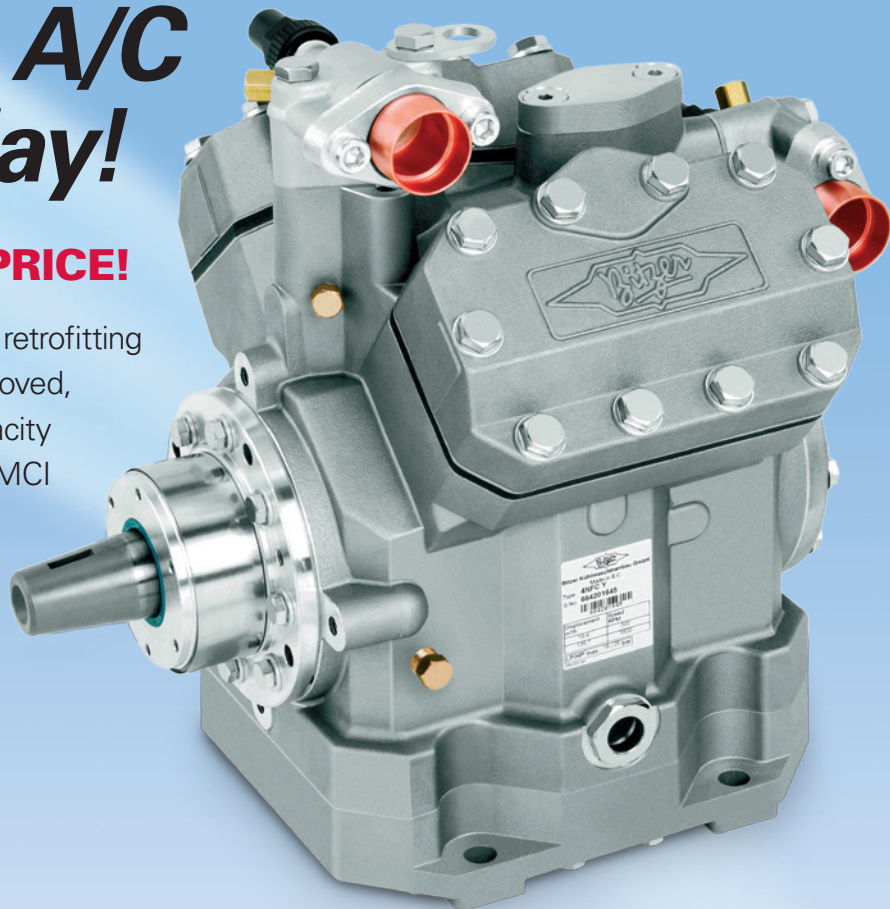

SPECIAL INTRODUCTORY PRICE!

Take your A/C to peak performance levels by retrofitting your J4500 and E4500 models with our improved, new A/C compressor—the same higher-capacity compressor that comes standard on current MCI models. The conversion kit is a near-direct replacement for the models' original compressor with Series 60 engines and comes with everything needed for easy installation.

When compared to the Carrier 05 G, our A/C compressor offers these benefits:

- ✓ **25% higher capacity at pull down**
- ✓ **50 lbs. lighter**
- ✓ **Lower oil carryover rate (0.2% vs. 1.0%)**
- ✓ **Uses a single unloader (vs. two unloaders)**
- ✓ **Greater continuous speed (3,500 max rpm vs. 2,200 max rpm)**
- ✓ **A great value—new-part quality for the price of a remanufactured Carrier.**

The MCI A/C compressor kits includes compressor, mounting base, hoses and hardware required. Plus, all original electrical connectors are compatible.

Number	Description	Introductory Price
T16-1154	A/C Compressor, E/J with S60	\$2,990.00
